RE: ITB 7383 - PURCHASE OF PEBBLE LIME

Dear Council Members:

The chemical above is a major treatment chemical requiring your consideration for passage. This bulk chemical is required to remove various impurities from the river water to convert the water to a drinkable condition referred to as "Potable." Pebble lime is the component of treatment that removes impurities and performs the softening. Without this chemical we cannot treat the water to make it potable. If you have any further questions, please call me at 427-1254 ext 1403.

Very truly yours,

Doug Pooler
Superintendent

DAP/klc
